EXPERIENCE

Software Engineer

January 2026 – Present

Projecx

Cairo, Egypt

- Build and maintain automation systems running across 200+ mobile devices in parallel using Appium.
- Implement microservices to manage device coordination, task distribution, and execution tracking at scale.
- Support automation pipelines processing thousands of daily tasks across multiple environments.
- Integrate automation services with data pipelines and AI-powered agent systems using LangChain.
- Improve system reliability, monitoring, and performance for production deployments.

Software Engineer

April 2024 – January 2026

Verto Wave

Cairo, Egypt

- Led development and deployment of StackX, an enterprise automation platform managing 10,000+ devices and 25+ backend services in production.
- Engineered a dynamic Workflow Engine supporting rollback, triggers, scheduling, and parameterized workflows, executing 1,000+ automated tasks monthly.
- Built the Vertowave Authorization Package using Keycloak, reducing team setup time by 95% and standardizing access control company-wide.
- Optimized backend APIs and SQL queries, improving performance by 30% and reducing average response time to under 200ms.
- Implemented CI/CD pipelines using Docker and GitHub Actions, reducing deployment time by 65% and enabling zero-downtime releases.
- Integrated AI-powered automation using Python and LangChain to improve workflow decision-making and predictive task execution.
- Leveraged AI tools to boost development efficiency by automating repetitive tasks and generating code templates.
- Collaborated in Agile teams, performed code reviews, and contributed to system architecture design across 25+ microservices.

Software Engineer

November 2021 – March 2024

Freelancer.com

- Designed and delivered secure internal data management systems for government and security sector clients, enabling real-time monitoring, tracking, and operational management of sensitive records across multiple departments.
- Built and deployed full stack web applications and e-commerce platforms for international clients, covering end-to-end development from database design to frontend delivery.
- Managed client requirements, project timelines, and technical decisions independently, delivering production-ready solutions across diverse industries.

PROJECTS

StackX Automation Platform

April 2024 – January 2026

Technologies: .NET, RabbitMQ, Keycloak, SQL, React, TypeScript, Python, LangChain, Docker

- Developed a visual workflow builder and real-time response tools, improving debugging efficiency and execution transparency across 10,000+ managed devices.
- Designed reusable UI and Authorization libraries, boosting frontend development speed and ensuring consistent company-wide standards.
- Delivered comprehensive auditing, tagging, and monitoring capabilities, reducing manual workload and deployment time significantly.
- Applied AI-driven workflow automation and predictive analytics for task prioritization and error reduction.

TECHNICAL SKILLS

Backend Development	.NET Core, C#, Entity Framework, REST APIs, Microservices Architecture, Python, Flask, Django, Golang, Java
Frontend Development	React, TypeScript, Blazor, JavaScript, Tailwind CSS, ShadCN, SASS, Bootstrap, jQuery, HTML
Message Queuing	RabbitMQ, MassTransit
Authentication	Keycloak, OpenID Connect, OAuth2
Databases	SQL (PostgreSQL, SQL Server), MongoDB, Elasticsearch
DevOps & Cloud	Docker, CI/CD, GitHub Actions, AWS, Linux, Git
Observability	OpenTelemetry
Testing	Unit Testing, Playwright, Appium (Mobile Automation)
AI & Automation	LangChain, AI-powered agent systems, workflow automation, n8n

EDUCATION

Bachelor of Science in Computer Science and Artificial Intelligence

Modern University for Technology Information

Cairo, Egypt
